

Introducing Sustainable Excellence in Quality Management

VeriFacts VQ is a comprehensive quality measurement and coaching system. From the moment a customer vehicle is entrusted to your facility, VeriFacts ensures the best possible repair. Your standard of quality excellence stays with the vehicle long after your customer drives away.

The VeriFacts VQ program verifies for the industry and the public that the manufacturer's guidelines and best quality practices are being followed. VQ status is earned by consistent demonstration of quality. VeriFacts coaches help participating facilities improve their culture of quality to be among the best in the industry.

For more information visit join.verifactsauto.com today and see how you can benefit from being a VeriFacts VQ Facility.
